

Roundtable: The insurance technology landscape: Finance & Actuarial Update 2019

You are invited to our inaugural round table discussion with finance and actuarial leaders from across the insurance spectrum.

The roundtable will bring together business leaders from Insurance, Finance and Tech - providing a platform for collaboration amongst a variety of industry leaders on the challenges and opportunities of the digital insurance technology landscape

This event will explore opportunities created by new Insurtech developments.

Insurance companies have the opportunity to create new sources of revenue by rethinking their traditional business models with the use of modern day technologies.

Key Topics

1. How will actuarial and finance functions adapt in the new digitally driven environment?
2. An update on the changing technology landscape given regulatory, statutory, operational and legal pressures
 - IFRS 17
 - Impact of Data Science
 - SAM pressures
 - Digital delivery models
 - Operationally efficient operating models

Event Hosts Include

Michael Jordan is a qualified actuary specialising in actuarial consulting, focussing on the role of technology & explaining complex topics in an easily understandable way.

Guy Shepherd is **CEO of SAL** - a company providing award-winning financial modelling technology solutions to the insurance industry.

Laura Edwards, **Director of Business Development, Relationship Management and Marketing at SAL**, is a senior executive in the financial markets with strong experience in technical, conceptual and content development of sales-driving collateral.
